The School of Architecture and Built Environment has an international reputation for pioneering problem-based learning, research-led learning and on-line learning in its undergraduate built environment programs.

The School has more than 900 undergraduate and postgraduate students studying architecture, design, construction management, property economics and quantity surveying. Importantly, the school has supported many international students to achieve academic success over the last 40 years and it has a distinguished record in teaching innovation and partnerships with industry.

The school enjoys the highest level of professional accreditation and its graduates are well regarded by industry and employer groups having regularly been rated amongst the most employable in the country and with some of the best starting salaries.

Significantly, academics in the School of Architecture and Built Environment have an international reputation for the quality of their research and school is an exciting community dedicated to teaching and research in support of the built environment professions.

## ARCHITECTURAL HISTORY TOUR OF GREECE AND ITALY

Students of the School of Architecture and Built Environment

On 6 June 2010, thirty seven people with connections to the School of Architecture and Built Environment at the University of Newcastle, met in Athens to begin a three week architectural study tour of Greece and Italy. Twenty four were attending a new course, AHIS3900 'Overseas Study Experience'. Most were students of architecture who all kept graphic diaries, in the grand tour tradition.

Rather than following a line on a map, the tour moved chronologically, from prehistorical to Classical Greece, then onto ancient and early Christian Roman architecture, followed by the Renaissance and Baroque periods in Florence and Rome. Students experienced first hand the manner in which the classical style as we know it came into being and impressed that style's rules and intricacies upon their own design sensibilities through the time honoured process of sketching, not as an end in itself, but as a step toward building their own works as practising architects. This exhibition celebrates each student's achievement and commitment to their chosen profession.
