Building Resilience

05 March - 25 April 2021

Exhibition to be launched by the Commissioner of Resilience NSW
Shane Fitzsimmons AFSM - 04 March at 6 pm

Building Resilience is an exhibition profiling engagement with local and global communities to raise awareness and support for the multiple dimensions needed for safer, better living in the 21st Century. A growing number of educational, government and private organisations focus on 'building resilience' as their central tenet to drive change. This trend is underpinned by the need to not only improve the human condition, but our capacity to respond to collapses in complex systems and environments.

The UN Sustainable Development Goals, provide us with opportunities to address the resilience agenda in a meaningful way. The twenty-nine exhibits from the researchers in the School of Architecture and the Built Environment, strive to find ways to build resilience at multiple levels - individual, community, systemic and global through governance, advocacy, design and education.
